

Easily access the most comprehensive, accurate location intelligence to help you create the most complete analysis.

We deliver industry-leading insights that solve each customer's unique challenges no matter the market.

LandVision™ shows you our data, your data, and 3rd party data – all on one cloud-based platform.

Everything You Need, All in One Place

LandVision helps you research, analyze, manage, and present opportunities in an easy-to-use application.

LandVision visualizes parcels and our other comprehensive map-ready datasets, as well as any data you'd like to upload.

Our web service delivers data to LandVision in real time, ensuring that you're working with the latest data available.

Get Time Back in Your Day

At an enterprise level, our Customer Support team can help you configure LandVision to meet specific organizational requirements. LandVision often eliminates redundant technologies across an organization and provides a standard application for everyone.

APPLICATIONS

LandVision™

Powerfully visualize and analyze data with our turn-key mapping applications and configure your business processes based on your needs.

MAP READY CONTENT

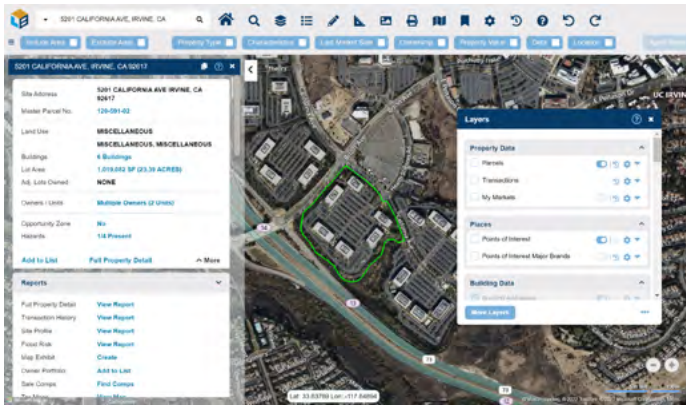

Leverage nationwide parcel boundaries combined with 300+ property and tax attributes, as well as other comprehensive datasets.

WEB SERVICES

Stream the latest content into our applications or a 3rd party application in real time with our robust APIs.

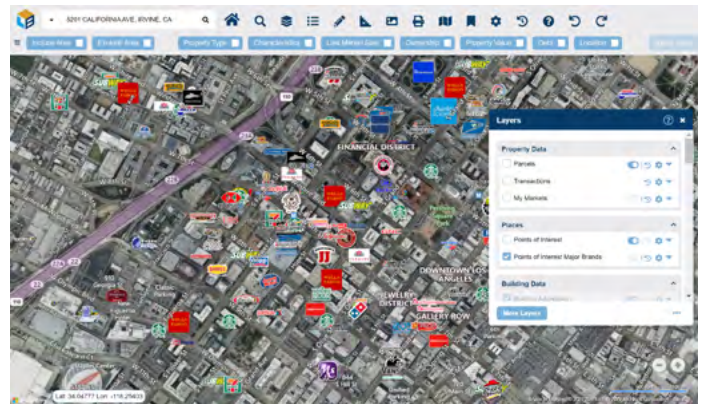

CUSTOMER SUPPORT

While our platform is available out of the box, our Customer Support team works with thousands of people to streamline their experience based on their unique area of focus.

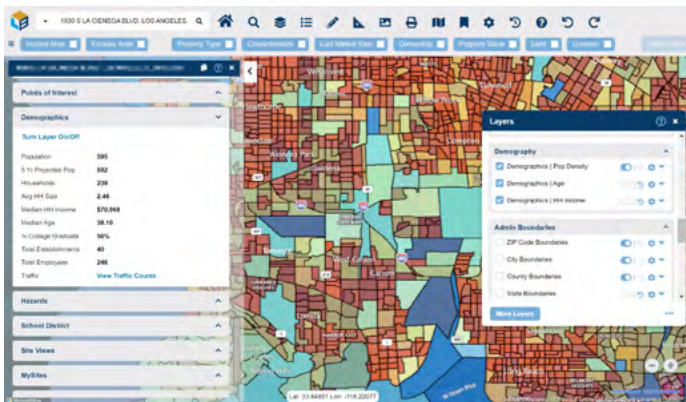

Research

- Discover and understand a property's characteristics, including assessed value and transaction history.
- Search and visualize specific properties to better understand co-tenancy opportunities and the competition within seconds.
- Study ownership portfolios, regardless of properties held in LLCs.

Analyze

- Search within multiple datasets simultaneously, including our data, yours, and a 3rd party.
- Pull alternative datasets in from public 3rd party servers.

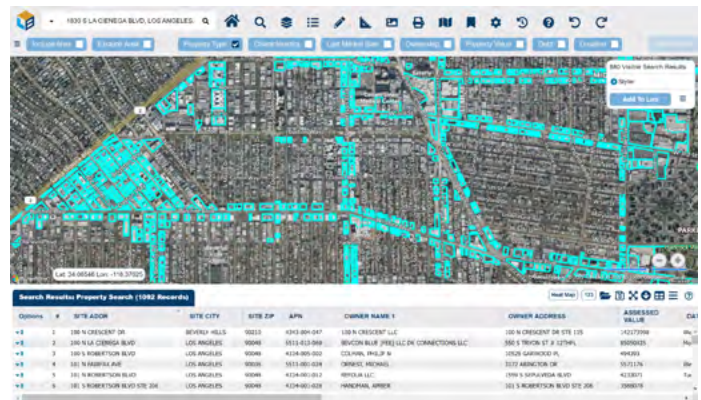

Manage

- Upload your own spreadsheets to build and manage a database of nearby comps with your most important requirements.
- Easily send mailers to property owners using automatic mail merge functionality.
- View your market and its changes over time.

Present

- Beautifully present candidate markets and properties with five different types of aerial imagery.
- Visualize your market using heatmaps, including comps, locations, demographics, and more.
